

Charlotte Mason's House of Education,  
Scale How, Ambleside, UK, 2009

The **Charlotte Mason Digital Collection** is a not-for-profit database created in 2009-2011 to assist scholars, researchers, educators and students to discover, use, and build upon the Charlotte Mason Collection of archives, journals and books housed in the Armitt Library & Museum (UK). To learn more about this database or to search the digital collection, go to [The Charlotte Mason Digital Collection](#).

Your use of images from the **Charlotte Mason Digital Collection** is subject to a [License](#). To publish images for commercial purposes, a license fee must be submitted and permission received prior to publication. To publish or present images for non-profit purposes, the owner, Redeemer University College, must be notified at [cmdc@redeemer.ca](mailto:cmdc@redeemer.ca) and submission of a copy of the context in which it was used also must be submitted to the owner at [cmdc@redeemer.ca](mailto:cmdc@redeemer.ca). Credit lines, as specified in the [License](#), must accompany both the commercial and non-profit use of each image.

Unless you have obtained prior permission, you may not download an entire issue of a journal nor may you make multiple copies of any of the digital images. Higher resolution images are available. [Low resolution (150 dpi), single copy printing is permitted: High resolution images for publication can be purchased. Please contact Redeemer University College in writing as specified in the [License](#) to request high resolution images.

While the document originals are housed in the Armitt Library & Museum, Redeemer University College owns the rights to the Digital Images (in jpg/pdf format) of the original archival documents and artifacts. The original Digital Images and database metadata are owned and maintained by Redeemer University College. Multiple images are bound together in PDF Packages. Click [here](#) to download the latest version of Adobe Reader for better viewing. In the PDF, click an image thumbnail to view it.

This project was made possible through collaboration among the [Armitt Library & Museum](#) (Ambleside, UK), [Redeemer University College](#) (Ancaster, Canada) and the [University of Cumbria](#) (UK) and with the financial assistance of the [Social Sciences and Humanities Research Council of Canada](#).

**Need help?** If you do **not** see a side-bar with image thumbnails:

Some of the PDF packages are large and will take some time to download. A very large PDF package may open more successfully if you download it first to your desktop. (From inside the database record, right-click on the link to the PDF package and save the link to your desktop.) Once it's on your desktop, you can open it up with a recent version of [Adobe Reader](#).

**If you have a Macintosh with Safari**, the default program to open PDFs is Preview, which does not open the PDF packets. Mac users need to download [Adobe Reader](#). If this cover page appears without a list of PDF files (either at the side or bottom of the screen), look for a paper clip or a menu option to view attachments. If you click that, you should see a list of the pages in the PDF package.

**Viewing files with Linux:** This works with the default PDF viewer that comes pre-installed with Ubuntu. While viewing this cover page in the PDF viewer, click "View" on the top toolbar, and check the box that says "Side Panel". That will bring up the side panel. The side panel will show only this cover page. Click the 'arrow' at the top of the side panel, and it will give you the option to view "attachments." If you click that, you should see a list of PDF files, which are the pages in the PDF package.

## OUR WORK.

*Annual Meeting.*—The date of the Annual Meeting was not fixed at the time of going to press; but Miss Blogg, P.N.E.U. Office, 28, Victoria Street, S.W., will be happy to give information.

*House of Education.*—Applications for Probationers should be made at once. There will be two or three vacancies for three months' students during the October Term, a circumstance which may not soon occur again.

*House of Education Natural History Club.*—Notes by M. L. Hodgson.—With the beautiful spring around us, and the prospect of a long summer before us, we shall do well to consider what definite work we mean to do this year. A few suggestions on making collections of various kinds will perhaps be of use to you, and especially now, when most of you are arranging your work for next term. The following list of collections contains so many things that children, of all ages, take an interest in, that I hope you will, all of you, find something useful in it. I will begin by saying a few words about collections of insects and birds' eggs. I very strongly advise you to discourage them, unless there is evidently a very great love for natural science in the person who wishes to collect them. Boys need much supervision in these matters.

*The Outdoor World* is a very good handbook for beginners; it contains many useful hints on all sorts of collections. During the nesting season I have always found many deserted nests, some of these are generally in good condition, and very beautiful; if they are fitted into neat boxes, and by degrees filled with their right number of eggs, they make a delightful possession. I say filled by degrees because no more than one egg should be taken, as a rule, from a nest.

But with regard to birds much more may be done than in merely collecting nests and eggs. Years ago I made a collection of skulls, both of birds and other small animals, they were not difficult to do, and when mounted on small cards they looked very well and were most interesting—to the cards containing the birds' skulls I added the merry-thoughts, which gave additional interest to the collection. The skins and feathers are also easily preserved; every dead bird or small animal we found was carefully skinned, and the skin preserved and mounted spread eagle fashion after it had been well cured with arsenical soap. For very small children the feathers only may be mounted in books or on cards with great effect. Skulls of bats, mice, moles, etc., may be prepared in various ways, and many boys find great interest and occupation in the work. I am speaking from experience gained during years of work with boys. We did not kill the animals—we used those we found or had given to us by the keepers and farmers who knew what we were doing.

Illustrating the flora and fauna of our village. On the subject of botanical collections much may be said, as they afford scope for all kinds of work for all ages. For the older children, a general collection of plants is not too much to attempt, but with the younger ones much less ought to be done. With the very tiny ones you might begin a collection of fir cones, of which there are many kinds; these are very
